Editorial & Opinion

The bait-and-switch on Alaskan energy

By Sen. Lisa Murkowski

An alliance of environmental activists and Democratic politicians has spent decades blocking the efforts of Alaskans to access the rich energy resources of our state. When Alaskans wanted to open the 1002 area of ANWR (Arctic National Wildlife Refuge) to exploration and production, opponents of progress stymied our efforts with fear-mongering and obstructionism. In so doing, they frequently pointed to the National Petroleum Reserve-Alaska in the northwest corner of the state as a preferable location for drilling. This, they argued, would protect the coastal plain of ANWR.

But now that the focus has actually swung to the NPR-A, this same obstructionist alliance is supporting a plan to greatly restrict oil- and gas exploration in the petroleum reserve.

This is a classic bait-and-switch. If opponents simply don't want Alaska to produce any energy, they should be honest enough to say so.

A land management plan billed by the Interior Department as "opening" half of NPR-A would actually close oil and gas activity in half the Reserve. It would also make it very difficult to construct the pipelines and other infrastructure necessary to get oil from the Chukchi and Beaufort seas

to the trans-Alaska oil pipeline.

The environmental community is even trying to rename the petroleum reserve as the "Western Arctic Reserve." The name itself declares their intention to wage war against responsible resource development in Alaska.

If there is one thing that should offend us all, it is America's dependence on the Organization of Petroleum Exporting Countries (OPEC). We import 4.5 million barrels of oil from OPEC each and every day. Our own continent, however, has been blessed with vast oil and natural gas resources that if responsibly developed could free ourselves from relying on imports from countries such as Saudi Arabia, Venezuela, Libya, Iraq and other familiar hotspots.

According to the Energy Information Agency, the United States has 220 billion barrels of technically recoverable oil and condensates. Other estimates range far higher. The Mexican government estimates its own technically recoverable resources to be 31 billion barrels, while Canada boasts some 175 billion barrels in proven reserves alone.

Alaska will necessarily play a large role in this energy revolution. NPR-A holds nearly 900 million barrels of oil, along with over 50 trillion cubic feet of natural gas, according

to the U.S. Geological Survey. The Chukchi and Beaufort seas may hold an additional 23 billion barrels of oil. Unfortunately, much of the state's resource bounty is locked up by its federal overseers.

The benefits of permitting Alaska to access its potential should be obvious. North Dakota, for instance, boasts an unemployment rate of just 3 percent. Wyoming's is just 5.7 percent. The budget situations in these states, which have benefited from the energy boom, is good. North Dakota actually has a \$1 billion surplus.

Oil and gas production creates thousands of jobs and fuels economic growth. Progress in the energy sector spills over into other areas of the economy as well. This is because equipment must be purchased, shipments must be transported, and workers must be fed. The result is a powerful multiplier effect. The World Economic Forum estimates up to four additional jobs can be created for every position in the deepwater or unconventional oil sectors.

Oil and gas production also provides a revenue stream for both state and federal treasuries that can be used to help address budget deficits.

The failure of the federal government to pursue a truly "all-of-the-above" approach to energy policy, however, is hindering the nation's ability to climb out of this recession.

Over the last four years, while permitting for oil and gas has been dramatically restricted, the national debt has risen by more than \$5.4 trillion and high unemployment rates persist around the country.

In the meantime, our reliance on imports persists. There is nothing noble about forcing oil production overseas where the environmental standards are weaker while blocking it here at home.

Self-sufficiency is an integral part of the American pioneering spirit. It is certainly central to the Alaskan character. A durable, realistic form of energy independence is within our grasp if only we approach it with common sense.

But too often decisions by the current administration, like the proposed management plan for the National Petroleum Reserve-Alaska, hobble American energy production and stop progress.

Alaskans don't need the federal government to protect them from themselves. We need reasonable access to the resources of our state to support a vibrant and growing economy that can support future generations.

The bait-and-switch is wrong for Alaska and wrong for America.

Lisa Murkowski is the senior U.S. senator from Alaska.

FOR IMMEDIATE RELEASE

No. 12-138

Alaska Timber Task Force Releases Report

Recommends expanding state forests, addressing needs of small timber operators

October 16, 2012, Juneau, Alaska – The Alaska Timber Task Force today released its report to Governor Sean Parnell recommending steps to improve economic conditions in Alaska’s forest-dependent communities.

Created by Administrative Order 258, the nine-member Alaska Timber Jobs Task Force reviewed issues affecting Alaska’s timber industry. Largely due to declining timber volume offered for sale by the U.S. Forest Service, the Southeast Alaska timber industry has nearly collapsed.

“Inadequate federal timber sales and reckless lawsuits by environmental groups bent on stopping all logging, and wiping out Alaska jobs along the way, are unacceptable,” Governor Parnell said. “This report provides clear and reasonable steps that can assist communities, schools, small businesses, and families in Southeast Alaska.”

Key recommendations include placing up to 2 million acres of federal land in a trust managed by the state, and seeking federal legislation granting states the option of running timber sale programs on federal lands. A state-run program would operate under state forestry standards and state laws.

The report looked at the state of the timber industry throughout Alaska. The industry is small but growing in the Interior and Southcentral Alaska, largely due to a dependable supply from state-managed timberland, according to the report. The Alaska Department of Natural Resources and businesses are working together as woody biomass becomes a cost-effective heating and energy option in rural Alaska.

In Southeast Alaska, however, the downward spiral of lost jobs and closed schools has continued. Despite federal law requiring enough timber sales to meet demand, the Forest Service choked off the timber supply; two of the last three mid-sized mills have closed.

In the past decade, Southeast Alaska timber jobs declined from 1,500 to roughly 200, the region’s population dropped 12 percent, and six schools closed.

The task force provided 34 recommendations to the governor addressing short-, mid- and long-term needs to stabilize and grow the timber industry.

These recommendations include:

- Expanding existing state forests and establishing new state forests

- Revising state statutes and regulations to address the needs of small timber operators
- Seeking state management of federal timber acreage in Southeast Alaska, or improved federal policies to meet timber supply demand
- Seeking a 250,000-acre state-federal land exchange, with dispersal of the newly acquired lands to Southeast communities for local economic use
- Pressing the federal government to advertise additional timber sales and exempt Alaska national forests from the 2001 Roadless Rule

The task force members include representatives from state agencies, the Governor's Office, the U.S. Forest Service, the timber industry, and Southeast Alaska communities. The U.S. Forest Service representative was a non-voting member of the task force.

The report is available at:

October 4, 2012

Water Docket
Environmental Protection Agency
Mailcode 2822T
1200 Pennsylvania Avenue NW
Washington, D.C. 20460

Attention: Docket # EPA-HQ-OW-2012-0195

The Resource Development Council for Alaska, Inc. (RDC) is writing to support the Environmental Protection Agency's (EPA) assertion that stormwater discharges from logging roads are not stormwater discharges associated with an industrial activity requiring Clean Water Act (CWA) Section 402 National Pollutant Discharge Elimination System (NPDES) permits.

RDC is an Alaskan, non-profit, membership-funded organization founded in 1975. The RDC membership is comprised of individuals and companies from Alaska's oil and gas, mining, timber, tourism, and fisheries industries, as well as Alaska Native corporations, local communities, organized labor, and industry support firms. RDC's purpose is to link these diverse interests together to encourage a strong, diversified private sector in Alaska and expand the state's economic base through the responsible development of our natural resources.

The State of Alaska promulgated statutes and implemented regulations to protect water quality from stormwater-related discharges from forest and logging roads. The State manages runoff from these roads through regulations developed under the direction of the Alaska Forest Resources and Practices Act for water quality management and pollution control. Best Management Practices (BMP) are in place to control erosion and sedimentation during road construction and to address ongoing drainage. Ongoing monitoring demonstrates the effectiveness of this approach. Similarly, the U.S. Forest Service has also developed BMPs that are consistent with those of the Alaska Forest Resources and Practices Regulations.

The State of Alaska is highly successful at protecting water quality through its current approach. RDC supports the continued use of the State's BMP-based programs, in lieu of requiring permitting under Section 402 of the Clean Water Act.

Thank you for the opportunity to comment.

Sincerely,

Carl Portman
Deputy Director

Resource Development Council's 33rd Annual
Alaska Resources Conference

Dena'ina Convention Center, Anchorage

Wednesday, November 14th

- 7:00 a.m. Registration/Check-in/Exhibits Open**
Eye-Opener Breakfast in Exhibit Area – **Sponsored by Alaska Cruise Association and Holland America Line**
- 8:00 Opening Remarks**

Alaska Resources Conference

Event Sponsorship & Exhibit Opportunities

Platinum Sponsor \$5,000

- Ten registrations to the conference (\$4,250 value)
 - Half-page ad in the conference program*
 - Sponsor recognition in all conference communications and the *Resource Review* newsletter
 - Display of your company logo in PowerPoint screens at the conference
- * Due Friday, October 26. Ads are 5" h x 7.25" w. Send ad and logo to RDC at resources@akrdc.org

Cosponsor \$3,000

- Six registrations to the conference (\$2,550 value)
 - Quarter-page ad in the conference program*
 - Sponsor recognition in all conference communications and the *Resource Review* newsletter
 - Display of your company logo in PowerPoint screens at the conference
- * Due Friday, October 26. Ads are 5" h x 3.5" w. Send ad and logo to RDC at resources@akrdc.org

General Sponsor \$2,000

- Four registrations to the conference (\$1,700 value)
- Sponsor recognition in all conference communications and the *Resource Review* newsletter
- Display of your company logo in PowerPoint screens at the conference

Underwriter \$1,000

- Two registrations to the conference (\$850 value)
- Sponsor recognition in all conference communications and the *Resource Review* newsletter
- Display of your company logo in PowerPoint screens at the conference

Exhibitor \$1,200

- Exhibit booth at the conference*
 - Includes one registration to the conference (\$425 value)
 - Recognition in conference program
- * Booths are 10' x 10'. Space selection is first-come, first-serve. Exhibition hall was sold out in 2011.

**Return pledge form by October 5 to be listed in the conference brochure.
Please send ads and logos by October 26 to resources@akrdc.org.**

Alaska Resources Conference

Specialty Sponsorship Opportunities

Wednesday or Thursday's Luncheon Sponsor \$6,000 each

Largest attraction of the conference featuring keynote speakers and gourmet lunch. **SOLD OUT!**

Wednesday or Thursday's Eye-Opener Breakfast \$5,000 each ONE REMAINING!

Every registrant's first stop! A warm buffet with a wide variety of breakfast fare.

Wednesday or Thursday Morning Breaks \$4,000 each SOLD OUT!

The conference stops for these popular breaks. Advertise your company with our specially-designed breaks!

Wednesday Afternoon Break \$4,000 SOLD OUT!

Network at an old-fashioned ice cream social event with other special treats.

Thursday Send-Off Toast \$4,000 SOLD OUT!

Champagne and sparkling cider and chocolate-covered strawberries provide an elegant conclusion to Alaska's premier conference on resource development. Sponsor is welcome to deliver closing toast.

Centerpiece Sponsor SOLD OUT!

Personalized arrangements at each table with your company logo.

VIP Reception Sponsor SOLD OUT!

Wrap up the opening day of the conference with a networking reception open to all conference attendees featuring cocktails and gourmet appetizers.

Wednesday or Thursday's Espresso Coffee Stand Sponsor SOLD OUT!

A big hit among conference attendees who so much appreciate gourmet lattes, mochas, and specialty teas. Your company logo on every cup!
